UPM IMPACT in SDG1
To end poverty in all its forms everywhere
EELISA ACITIVITIES AROUND SDG1

"Artificial Intelligence, Ethics & Human Rights" Student explanation videos

Description

This activity encourages students and users of the UPM Radar of Economics @Intelligence to submit and publish their analysis and explorations of microeconomic and macroeconomic sectors or countries. For UPM students, this is closely related to their required essay in some subjects. However, we encourage anyone, specially from EELISA communities, to submit their contributions.

Submissions are open since December 2022 until end of 2023. Guidelines and rules for submissions are here:

https://upm365-my.sharepoint.com/:w:/g/personal/raul_g_sanchis_upm_es/EdPxlEWTfcBJpTKx3x5hpQ0B6qtI-1zKmbUyPeqk03fmfQ?e=EqnTp1

(Selected) Contributions will appear in:

Meeting between representatives of the two partner universities- University POLITEHNICA of Bucharest and İstanbul Teknik Üniversitesi

Description

The SS4E is a 2 day hybrid hands-on course/workshop that will assist students and researchers at various levels to equip themselves with indispensable tools for developing, designing and implementing effective engineering projects with social impact.

"An engineer and a social scientist walk into a bar and start talking about their research over a beer. And…"

This is a two day long workshop for students and researchers from engineering backgrounds that seeks to unearth and address challenges and conundrums faced by engineering students and researchers in their projects that have direct and/or indirect social impact. The workshop will equip participants with necessary conceptual and theoretical tools in the social sciences to help improve participants' skills in thinking holistically and critically about developing engineering projects contributing to SDGs. It will provide a platform to share their experience and critically reflect upon their projects and converse with their colleagues about how to improve their projects more effectively through including social aspects in their works/projects, with special attention to the SDGs.

"Social Science Emergency Workshop for Engineers" lasts two days with a total of 6 hours devoted to lectures/teaching and 6 hours to participatory activity. The teaching section will focus on elaborating and discussing with participants social science concepts and perspectives that are indispensable for sensitizing engineering students and researchers the stakes of developing projects with social impact. During the remaining 6 hours of participatory activity, workshop participants (grouped into their level of competency as students, researchers, professors) will communicate their research projects and discuss their shortcomings when viewed from a sociological perspective and how these shortcomings could be improved to enhance their social impact.

Support options for travel and accomodation

Travel and accommodation might be covered or supported by your institution, please contact your local EELISA project coordinator.

EELISA's Carbon Footprint Alliance- looking for partners

Description

The Leadership and Technology Center (CLyT) offers training in transversal skills to all EELISA communities. Courses / workshops have been designed that are independent (a selection of them can be taken) and complementary (by taking all of them, the student has a complete experience).

Each workshop lasts two weeks, and six modules are offered:

MODULE 0: Leading with values (English)

MODULE 1: Lead your Professional Future.

Self-leadershipTeam leadershipWork in the digital age

MODULE 2: Connect with others.

Emotional intelligenceRegulation of conflictsCommunication in digital environments

MODULE 3: Transforming the world.

Change managementCommitment managementLeadership in diversityTeal organizational transformation

MODULE 4: Time efficiency.

Time management and personal efficiencyAgile methodologiesCoach leader

MODULE 5: Flowing professionally.

MindfulnessInsight. Boost your creativityEfficient communicationKnowmad. Your professional identity

Estimated participant dedication: 1 ECTS per workshop

They are developed with digital materials that the participant can follow with flexibility. Exercises and online discussion forums are proposed. Face-to-face sessions at the CLyT facilities. Two for each module that can also be followed online in synchronous mode.
